

TV Programming/DirecTV

TV service within the Village is provided by your HOA. Programming is provided by DirecTV and is via a High Definition-HD signal.

How do I receive the HDTV?

1. Pro-idium HDTV

- ✓ These TV's are designed to function with the incoming HD DirecTV signal.
- ✓ You can purchase a new LG HDTV with pro-idium through SVH, install, set-up and programming are included in the cost.
 - Pricing is attached.
 - The 43" LG fits well between fireplace sconces.
- ✓ You can purchase an HDTV with pro-idium on your own.
 - Billed at an hourly rate, SVH can do the installation and attempt the setup and programming. No guarantee that SVH will be able to configure a TV that was not purchased through SVH.

2. HD Converter Box

- ✓ HD Converter Box has drawbacks, and SVH does not recommend and will no longer install HD converter boxes because of the complexity of channel mapping and multiple remotes.
- ✓ Homeowners may independently purchase from 3rd parties an HD converter box and will be solely responsible for installation, configuration, and maintenance.
- ✓ SVH will continue to service existing boxes purchased from SVH.
